## Training description

The training workshop is part of a capacity building partnership entered into between ITU and ITSO for the delivery of satellite communications training. This training will be facilitated by two experts with extensive experience in satellite communications and will be delivered in English. The following topics will be addressed: • Basics of satellite communications; • Policy and regulatory guidelines for satellite services; • Network planning and link budget analysis; • VSAT installation and maintenance; • VSAT Equipment and bandwidth procurement; • Radio regulations.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

## How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on

the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
