Description

With the completion of this training, learners will have a deep understanding of the benefits of an

Information Security Management System (ISMS), and the knowledge on how to plan and implement an ISMS all by themselves. They will be able to integrate the ISMS in the management structure of a company or organization in connection with other management systems. Finally, they will be able to prepare their company or organization to meet the requirements to successfully complete a certification audit according to ISO 27001.

Registration and payment information

[Document on registration and payment information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
