Description

Description:

Vulnerabilities that exists from connecting to the network increases as more people and devices become connected and smarter. This program aims to equip participants with the necessary knowledge and skills to counter the threats from cybersecurity and protect critical infrastructures.

Learning outcomes:

Upon completion of this training course, participants will be able to:

- understand the impact of cybersecurity threats and the importance of critical infrastructure protection;
- apply national cybersecurity strategies frameworks;
- identify different critical infrastructures and its vulnerabilities as well as threat mitigation techniques; and
- apply these cybersecurity concepts in the context of various applications such as smart grid, smart city and for Industry 4.0.

Audience:

Executives, managers, engineers and technical staff from regulators, policymakers, telecom operators and academia and government organization

Registration and payment information

[Document on registration and payment information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse

backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
