Training description

5G technologies address a variety of applications in many fields, but those related with IoT are of particular interest given the great number of devices that are being connected. There is no doubt that 5G will play a pivotal role, both in massive and in critical applications. This capacity building course aims to provide the audience with an understanding of the 5G aspects relevant to IoT. Participants will be exposed to the general aspects of wireless networking with the particular requirements of machine type communications and will then dive into specifics of LTE-M and NB-IoT. Practical examples of 5G technologies for IoT will be demonstrated.
