Description

Internet and IP protocol is the winning technology in current telecommunications world. 'Over' IP is the concept that can be conside red in the context of almost all today's telecommunications services. Good understanding of this 'IP world' requires not only knowledge of technical aspects, of the IP technology, but also strategic, political business issues. The course aims at presenting the current process of innovations in Internet from all of these important perspectives.

Registration and payment information

[Document on registration and payment information (English)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
