Building an effective Cyber Incident Response Team

Organized by:

Training details

Modality: Online instructor led

Dates: 17 Nov 2021 - 19 Nov 2021

Training fees: \$0.00

Language: English

Registration deadline: 12 Nov 2021

Training code: 21OI026527AFR-E

Contact: kusmani@cert.ncb.mu

Training description

The frequency and complexity of today's cyber attacks makes incident response a critical function for organizations. The management of an incident response team is a very often-neglected topic. Incident response is the last line of defense against cyber attacks for many organisations or even countries. Detecting and efficiently responding to incidents requires strong management processes and driving an incident response team requires special skills and knowledge. A background in information security management or security engineering is not sufficient for managing incidents. On the other hand, incident responders with strong technical skills do not necessarily become effective incident response managers.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account [here](#)
2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.

International Telecommunication Union
Place des Nations, 1211 Geneva 20
