Training description

<p>The mobile industry is preparing to embark on the transition to fifth generation (5G) technology, which will build on the achievements of 4G while also creating new opportunities for innovation. 5G will usher in a new era that will see connectivity become increasingly fluid and flexible. This four-week course covers the key aspects of 5G technology and examines the role governments and regulators can play in helping unlock the benefits of future 5G services for their citizens. Course Objectives: - Learn about the underlying technologies and concepts associated with 5G. - Discover the key differences between 5G and previous generations of mobile technology. - Understand how governments and regulators can help accelerate the development of 5G technology and services in their countries.</p>

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)

3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
