AI for Good: Technology, Strategy and Policy Development

Training details

Modality: Online instructor led
Dates: *15 Jul 2021 - 16 Jul 2021*
Training fees: $0.00
Language: English
Application deadline: 13 Jul 2021
Training code: 21OI26645MUL-E
Contact: hcbmail@itu.int

Training description

This training course surveys current and emerging technical, legal and policy issues related to AI. We will consider distinct settings where regulation of AI is emerging as a challenge or topic of interest, including data protection laws, sectoral regulatory frameworks (health, agriculture, transport, education, etc.), intellectual property (IP) laws, anti-trust/competition laws, consumer protection laws, cyber and information security laws. We will also touch upon issues such as the proliferation of algorithmic decision-making and autonomous systems; the issues of ethics, fairness, transparency and accountability raised by AI techniques such as machine learning; balances and interactions between regulation and innovation; the effects of AI on human rights and economic well-being. In the end, the training course will give an overview of the main building blocks of national AI and data strategies for development, by using specific examples/case studies of countries that have been successful in formulating AI and data strategies fit for their development purposes.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
