Training description

The course dives deep into CSIRT/SOC establishment practice, where combination of theory, unique experience with lessons learned, and hands-on practice give attendees a clear and actionable picture on how to build an effective cybersecurity team. This training helps to successively prepare for cybersecurity team establishment and answers the main questions raised before starting: 1. How to build an effective cybersecurity team? Overview, discussion, and practice about a mandate, governance, team and its structure, timeline, lessons learned from similar establishments, financial planning. 2. What services in addition to incident management to introduce and how? Applied mandatory and complimentary services, best international practice for services models, incident management, incident management workflows and variations. 3. What technology is behind it? Scrutiny of principal architecture for CSIRT stack, integrations and managerial (not technical) look into technologies, automation vs manual, and technology trends. 4. How to mature security services and when? Elaboration of KPIs, SLAs and related metrics, security briefings, weekly/monthly/quarterly/yearly reports, analysis of examples and exercises on how to plan improvements for security services provided. 5. What is the baseline for it? Presentation
