Registration information

The Key Technologies of IoT and Its Application in Smart Home

Training details

Modality: Online instructor led
Dates: *15 Aug 2022 - 26 Aug 2022*
Training fees: $0.00
Language: English
Registration deadline: 12 Aug 2022
Training code: 22OI027824ASP-E
Contact:

Training description

This course will help the participants to build the knowledge of technical evolution, principals, standards progress, typical implication scenarios, and future development trend of key technologies relating to IoT, such as WIFI and WIFI 6, Bluetooth and mesh, NFC, wireless charging, Low-Power Wide-Area Wireless Technology (LPWA), etc. And let the participants obtain the general knowledge of smart home, including network and terminal technologies, practices and innovative development of operators in the field of smart home, and the security issues and challenges faced and the main security technologies used in smart home.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account here
2. Register for the course here

The [ITU Academy](#) is the International Telecommunication Union
leading platform for capacity development initiatives.
