Description

Smart Islands is a Programme that adopts an innovative approach to deliver connectivity and scalable and sustainable services to disadvantaged island communities. The Smart Islands Programme aims at transforming rural and coastal communities and improving their well-being and livelihood by connecting them to a range of digitally enabled services. Considering the IoT and Blockchain solutions as key elements of digital transformation can help to achieve the goals of smart islands.

Registration and payment information

[Document on registration and payment information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
