Training description

Cloud has become an important factor to realize innovation in government. In this context, government should introduce Cloud in gove rnment to government (G2G) and government for citizen (G4C) services to ensure effective and citizen-centered government. In this course, understanding of cloud technology, cases of Cloud policies in major countries and key issues when introducing Cloud to public services will be covered. This course does not cover the detailed cloud techniques.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.
