Training description

With the advent of the data era such as big data and AI, it has become imperative for government to make rational and scientific policy decisions based on data analysis. Therefore, countries around the world are making their efforts to establish data-based government to increase the effectiveness of policies and improve the quality of administrative services. In this context, this course covers understanding of data-based administration, cases of data-bases policies in major countries and major issues of data-based government. This course does not cover detailed data analysis techniques.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).
