Description

This course covers the core functions of spectrum management and spectrum engineering techniques and is mainly targeted towards the staff of National Spectrum Management agencies. This course covers the core functions of spectrum engineering, including emerging radiocommunication technologies, spectrum efficiency, coordination procedure, and frequency management regulation.

Registration information

[Document on registration information (English)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
