## Description

This course exposes participants to methods used for social media analytics that can be used to convert information derived from social media into insightful tools and how to interact with consumers in real-time. It teaches participants how to manage social media platforms in order to project their online reputation. Objectives of the training course include the following: • Understand the importance of Social media. • Understand how to use different social media platforms. • Understand how to create good and objective social media content. • Understand Social media Analytics. • Understand ways of managing organisational online reputation.

## Registration and payment information

[Document on registration and payment information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
