#### Training description

The hands-on training course on Incident Response Practice will be delivered by two prominent field experts and focus on practical skills to handle and respond to the computer security incidents. All teaching material is based on illustrative real-life cases experienced by trainers or their customers. Several different incident handling cases will be simulated to students with a focus on: incident detection and description; information gathering; analysis tools and techniques; incident handling phases by using RTIR (or related) tool. Additionally, to increase the range of knowledge in incident handling, cyber threat hunting tips will be provided. After the course, participants will be able to exploit gained knowledge and skills in their daily work.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

#### How to register

In order to register for the training, participants should:

1. Create an ITU Academy account [here](#)
