Cybersecurity Techniques: A Hands-On Approach

Organized by:

Training details

Modality: Online instructor led

Dates: 17 Aug 2022 - 19 Aug 2022

Training fees: \$0.00

Language: English, English

Registration deadline: 12 Aug 2022

Contact: kusmani@cert.ncb.mu

Training description

The protection of information is a critical function for all enterprises. Cybersecurity is a growing and rapidly changing field that focuses on the protection of information assets that are embedded in internetworked information systems. Given today's technological advances, professionals who are involved in information technologies must be knowledgeable about the central concepts and security implications that frame and define this increasingly all-pervasive field. After completing this course, attendees will be able to:

- Identify key concepts and terminology in cybersecurity
- Define the key concepts, roles and domains of cybersecurity
- Identify the various types of cybersecurity architecture
- Identify the key components of securing networks, systems and applications and data
- Identify an incident and outline the phases of incident response
- Identify the implications for adaption of evolving technology

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)

2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.

International Telecommunication Union
Place des Nations, 1211 Geneva 20
