Training fees: \$0.00

Language: Russian, Russian

Application deadline: 01 Apr 2022

Contact: janna05_05@mail.ru

Training description

Please note that this course is taught in Russian and will be conducted face to face. Javascript is one of the most popular programming languages in the world, which is used to create interactive web pages, in server-side development. It works on Windows, macOS, Linux and mobile platforms, that is, everywhere. The course contains all the fundamental concepts: algorithms, object-oriented model, data structures. The course is designed to teach how to work with a computer for both users with a "zero" level of knowledge in the field of ICT, and for those who already have some basic PC skills.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
