Start-ups readiness for IoT deployment training: Pre-compliance testing

Training details

Modality: Online instructor led
Dates: *28 Mar 2022 - 06 May 2022*
Training fees: $0.00
Language: English
Application deadline: 23 Mar 2022
Training code: 22OI500031MUL-E
Contact: hcbmail@itu.int

Training description

This module course will provide awareness to start-up teams on the role and impact of Conformity and Interoperability (C<(>&<)>I) relevant to their path to market for their IoT related products and services. The material will provide a road-map to allow the start-up to evaluate where they are located on their journey to market. Tools will also be provided to help the start-up establish their level of risk as relates to C <(>&<)>I and how this risk can be managed as the start-up meets their C<(>&<)>I obligations as they move forward. Upon completion of this course module participants can be expected to have a working knowledge of the relevant C<(>&<)>I considerations for each stage of their IoT related product/service development. This knowledge will allow start-up teams to plan for and manage the relevant C<(>&<)>I related activities throughout their product development cycle in terms of activities, expertise and funding. This information can assist start-ups in avoiding costly mistakes in developing and deploying their IoT related products and services.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here

3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
