Smart Sustainable Cities, ICT Applications and E-Government: Incorporating Data, Network and AI Technologies Towards More Efficient Cities

Training details

Modality: Face to Face
Location: Jeju Island, South Korea
Dates: *15 Jul 2019 - 18 Jul 2019*
Training fees: $0.00
Language: English
Registration deadline: 18 Jul 2019
Training code: 19WS24351ASP-E
Contact: seolji0@nia.or.kr

Training description

The face-to-face training course on âSmart Sustainable Cities driven by Data, Network, AI Technologiesâ is scheduled to be held in Jeju, Republic of Korea from 15-18 July 2019. This training is organized jointly by the International Telecommunication Union and National Information Society Agency (NIA), in partnership with the World Bank and the World Smart Sustainable Cities Organization (WeGO), as part of the ICT Application programme under the auspices of the ITU Centres of Excellence for Asia-Pacific. The training will be delivered in English. The training course is designed to develop an understanding of the policy-making process to build smart sustainable cities, the application of frontier technologies, introducing the best practices and learning from the Republic of Korea, and share the challenges as well as lessons learnt. Detailed information on this training course is described in the course outline which can be downloaded from the ITU Academy Portal at the following link http://academy.itu.int/ and http://www.itu.int/itu-d/asp. This training is targeted at central and regional governmental officials who are in charge of smart city or interested in application of frontier technologies such as big data, network, and Artificial Intelligence in smart city application. Registration should be made online at the aforementioned link no later than 5 June 2019. The training is offered free of charge with contributions from NIA and partners. If you need any further information, please feel free to contact Mr. Ashish Narayan (ashish.narayan@itu.int) from the ITU and Ms. Jiyoung Seol (seolji0@nia.or.kr), from NIA.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account here
2. Register for the course here
