### Training description

This course covers the core functions of spectrum management and monitoring and is mainly targeted towards the staff of National Spectrum Management agencies. Inclusive of the detailed case studies from China, the course consists of detailed sessions on topics IoTs, Smart cities, Radio-communication monitoring technologies, Digital Broadcasting etc. amongst others. The training course also provides an empowering learning environment through a combination of lectures and visits focused on sharing information with the participants of modern technical tools to facilitate national radio frequency management and monitoring in an efficient and effective way.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).
