Description

Child Online Protection (COP) is a growing concern today as children are at risk of violence, abuse, exploitation, and neglect online. Engaging parents in online safety has never been more important as parents and guardians must understand the exact nature of children's online engagements and their child's understanding of the dangers and the likelihood that the parent can reduce risks and safeguard their children. This self-paced course is designed for parents and guardians about child online behaviours, threats and risks associated with cyberspace, how to deal with children, and building an open conversation in the family setting.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
