Description

The Universal Service Financing Efficiency Toolkit is a practical guide for impactful and sustainable universal access and service i mplementation. It provides analytical tools, examples, and templates that are grounded in practical experience and designed to help policy-makers, regulators and universal service fund administrators to navigate common questions and challenges they face when using public funds to design, implement and finance programmes and projects that facilitate access to digital technologies and communication infrastructure. This training provides concrete guidance on each of the four parts of the toolkit. This toolkit helps to navigate the multitude of business models that need financial support in order to have a local, municipal and national impact, as well as to meet the UN Sustainable Development Goals (SDGs) and targets related to and facilitated by digitalization. The ITU universal service financing efficiency toolkit and training modules were developed by the International Telecommunication Union (ITU) with the support of Government of the United Kingdom Digital Access Programme (DAP) to promote effective regulation, greater investment, and innovative models for school connectivity in unserved communities and for broader digital inclusion.

Registration information

[Document on registration information (English)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
