How to design and develop online courses

Organized by:

Training details

Modality: Online self-paced
Dates: 16 Jan 2023 - 31 Dec 2023
Training fees: \$0.00
Language: English, English
Registration deadline: 22 Dec 2023
Contact: hcbmail@itu.int

Training description

The objective of this training course is to improve the participants' skills in the design and development of online courses. The course is made up of 5 modules. Participants will be invited to develop their own course by completing specific tasks and will have access to a range of open multimedia resources that will allow them to convert face-to-face course contents into online courses using a variety of media tools. NB: Module 5 is about Moodle features and tools, in general, as well as about the ITU Academy Moodle platform. Although you may not be ITU staff or ITU tutors you are required to complete Module 5 in order to receive the badge. The course is designed for people with little familiarity on the topic of e-learning design. It will enable participants to develop and/or improve their digital skills in instructional design, e-learning content development and adapting to online teaching methods.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)

2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
