Training description

The SMTP is designed for individuals within ICT and telecommunications sectors who wish to enhance their knowledge and competence in the area of spectrum management. This includes engineers and managers working in telecommunications regulatory authorities, ICT service providers and other ICT stakeholders. The aim of this course is to provide students with spectrum engineering foundations in order to be able to perform link budget calculations, interference analysis, and provide understanding of 3D propagation modelling for radio communications services frequency planning. This is intended to support modern spectrum management.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply
