Governance, innovation and inclusion: digital transformation for small states

Organized by:

Training details

Modality: Face to Face

Dates: 25 Sep 2023 - 29 Sep 2023

Training fees: \$0.00

Language: English, English

Application deadline: 07 Aug 2023

Contact: hcbmail@itu.int

Training description

Delivered from the perspective of a small state, this course will share Singapore's policy, regulatory and economic development approaches to digital transformation in the digital economy. It will focus on how small states can maximise opportunities in the digital economy (such as in the areas of data, digital utilities, and emerging technologies) while mitigating the accompanying risks. The course will also explore how governments can work together with the private and people sectors. This in-person training course seeks to strengthen senior government officials' understanding of the opportunities and challenges in policy and regulation for the digital economy and enable them to better leverage digital transformation to drive social and economic development.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)

3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
