Network forensics: a practical approach

Organized by:

Training details

Modality: Online instructor led

Dates: 28 Aug 2023 - 08 Sep 2023

Training fees: \$0.00

Language: English

Application deadline: 18 Aug 2023

Training code: 23OI100239MUL-E

Contact: kusmani@cert.ncb.mu

Training description

Network forensics is a subset of digital forensics that deals with network attacks and their investigation. In the era of network attacks and malware threats, it's now more important than ever to have the skills required to investigate network attacks and vulnerabilities. Network Forensics starts with the core concepts like coding, networking, forensics tools, and methodologies for forensic investigations. We will also explore the tools used for network forensics, followed by understanding how to apply those tools to a PCAP file and write the accompanying report. By the end of this training, you will have gained hands-on experience of performing forensic analysis tasks.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on

the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
