ITU-ITSO training on Satellite Communications

Organized by:

Training details

Modality: Face to Face

Location: Minsk, Belarus

Dates: 01 Apr 2019 - 05 Apr 2019

Training fees: \$0.00

Language: Russian, Russian

Registration deadline: 25 Mar 2019

Contact: farid.nakhli@itu.int

Training description

The objective of the training workshop is to provide participants with in-depth understanding of satellite communication systems, technologies and protocols as well as a comprehensive introduction to VSAT concepts and systems, including emergent broadband satellite systems and services. The workshop will also focus on the ITU Radio Regulations and policy and regulatory guidelines for satellite services. Participants will learn how to assess VSAT systems for deployment into corporate wide area network solutions. A wide range of issues relating to satellite communications and regulatory matters will be covered, including the role of the regional and international satellite communications organisations and issues to be addressed at the World Radiocommunication Conference 2019 (WRC-19).

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)

2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
