Description

Information and communication technologies (ICTs) have become a part of everyone's life as the primary means for communications, information sharing, transactions, education, and entertainment, regardless of one's age, gender, or ability. Therefore, it is essential to know how to communicate with each other in a digitally inclusive way, mainstreaming ICT accessibility as the key to achieving a digitally inclusive world. To achieve inclusive communication, ICT accessibility requirements, principles, and standards should be fully considered and implemented. ICTs should not only be available and affordable but also accessible, so designed to meet the needs and abilities of as many people as possible, including those with disabilities. Accessibility of ICTs is compulsory if we wish to ensure that everyone's right to communicate in the digital world is respected. This training course encompasses a holistic introduction to ICT accessibility from the perspective of digital inclusion. The course includes an overview of relevant ICT accessibility requirements, policies, regulations, standards, as well as the tools and resources such as practical advice on the public procurement of accessible ICTs.

Registration information

[Document on registration information \(English\)](#)

[Note d'information pour inscription \(Français\)](#)

[Documento de información sobre la inscripción \(Español\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
