Description

In this comprehensive course, we will delve into the critical issue of electronic waste (e-waste) on a global scale. E-waste, comprising discarded electronic devices and equipment, presents a growing environmental and societal challenge. This course aims to provide you with a comprehensive overview of this issue, incorporating the latest statistics and legislative developments sourced in the Global E-waste Monitor and the Global E-waste Statistics Partnership.

Registration information

Document on registration information (English)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
