Dates: Open
Training fees: $0.00
Language: English
Registration deadline:
Training code: 24OS100332MUL-E
Contact: martin.schaaper@itu.int

Training description

This training aims to strengthen the capacity of countries to produce ICT indicators and statistics according to international standards and methodologies. It is intended to assist national statistical offices in collecting and compiling ICT statistics on the access and use to ICTs by households and individuals, by providing guidance on the collection, processing, evaluation and dissemination of ICT household statistics. It presents the definitions of the indicators following the _ITU Manual for measuring ICT access and use by households and individuals_, as well practical advice how to plan, design and conduct ICT household surveys. After taking this course, participants should be able to manage the conduct of an ICT household survey at the national level.

With generous support from the Global Gateway initiative of the European Union, participation in this training programme is free of charge.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account here
2. Register for the course here
