Training details

Modality: Online self-paced

Dates: 10 Jan 2024

Training fees: \$0.00

Language: English, Portuguese, Other, English, Portuguese, Other

Registration deadline:

Contact: fns@itu.int

Training description

Broadband mapping combined with modern Geographic Information Systems (GIS) and its practical knowledge supports efficient identification of connectivity gaps, network planning to extend access to most critical places, and support to decision making based on evidence-based models. This training offers an introductory path to anyone interested in embarking on the exciting broadband mapping journey. Consisting of 5 modules, from the beginning GIS, data and demonstration of open source practical tools.

The Broadband Mapping training modules were developed by the International Telecommunication Union (ITU) with the support of the Government of the United Kingdom Digital Access Programme (DAP) to promote effective regulation, greater investment, and innovative models for connectivity in unserved communities and broader digital inclusion.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
