Description

This course is based on two ITU products: The Last-Mile Connectivity Internet Solutions Guide and Broadband Connectivity Toolkit. The Last-Mile Connectivity Internet Solutions Guide was developed to support the design and development of programmes and interventions that address the lack of Internet infrastructure availability in certain areas and high Internet service prices that make Internet connectivity unaffordable for local populations.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
