## Description

This self-paced training course offers an introductory exploration of strategic foresight tailored to individuals engaged in fostering digital innovation for sustainable development. With a focus on bridging the digital divide and addressing global challenges, the course emphasizes the crucial role of strategic foresight in shaping equitable futures. Through seven modules, participants delve into essential concepts, tools, and terminology while honing practical skills in futures thinking. The course equips learners with the competencies to integrate strategic foresight into their specific domains, fostering strategic thinking and innovation in digital development initiatives. By recognizing the value of strategic foresight processes, participants gain insights to drive meaningful change in their projects, policies, and strategies, ultimately contributing to the realization of the UN Sustainable Development Goals (SDGs)

## Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
