Description

This course is primarily based on the ITU/World Bank digital regulation platform with a focus on the following aspects: digital transformation strategies, regulatory governance, evidence-based decision making, regulatory sandboxes, competition and economics (market analysis), infrastructure sharing, universal access and service financing efficiency, data and consumer protection, and transformative technologies regulatory aspects. The scope of this course is to examine specific aspects of digital transformation policies and regulation to enhance further knowledge of participants on the issues at stake. The course therefore does not provide for an in-depth analysis of each and every regulatory aspect of digital regulation but enables participants to get a deeper understanding and greater knowledge on specific aspects of policy and regulation in a digital world. The online training will be organized by ITU-EMERG-EaPeReg, for their members and other regional regulatory associations and their members. This training is part of the Digital Regulation Network, which aims to accelerate sustainable digital transformation through common approaches to collaborative digital policy, regulation and governance across economic sectors and across borders.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and

landlocked developing countries.
