Training details

Modality: Online instructor led
Dates: *22 Jul 2024 - 12 Aug 2024*
Training fees: $0.00
Language: English
Application deadline: 15 Jul 2024
Training code: 24OI100384MUL-E

Contact: rj@nrdcs.lt

Training description

This comprehensive training program is tailored to provide attendees with practical analyst skills in Cyber Threat Intelligence (CTI) using MISP - one of the most widely used Threat Intelligence Platform (TIP) platform in the field. MISP is a powerful open-source threat intelligence platform organizations can use to store, share and receive information about malware, threats, and vulnerabilities in a structured way. Participants will examine the logic of different tasks analyst do, immerse themselves in real-world scenarios to understand how responder teams effectively leverage CTI through MISP. They will learn how to extract valuable insights from intelligence feeds and master the formulation of strategic questions to maximize organizational benefits. Additionally, the focus on the added value of contributing to the TIP will be covered, teaching participants how to create queries and share intelligence effectively. With a dedicated emphasis on intelligence sharing, students will gain crucial insights into what, how, and to whom information can be shared for various purposes. Access to the MISP platform will be provided, allowing participants to practice and complete homework assignments designed to reinforce their learning.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
