Registration information

Disruptive technologies and governance in the digital era

Training details

Modality: Online instructor led
Dates: *24 Jun 2024 - 22 Jul 2024*
Training fees: $0.00
Language: English
Application deadline: 17 Jun 2024
Training code: 24OI100385MUL-E
Contact: ntsibane.ntlatlapa@wits.ac.za

Training description

The sessions give a non-technical overview of the technologies and infrastructures underpinning the delivery of telecommunications, broadcasting/audio-visual services and their corresponding applications and service markets, including telecommunications and next-generation broadband networks, as well as applications in the broader ecosystem. We review trends and drivers underpinning the growth of digital communications markets, noting the range of emerging technologies coming into common use, from agritech to fintech and smart environments. The sessions aim to give participants a conceptual grasp of the dynamics and developments relevant to the broad digital technology environment and markets, as a foundation for fostering future-oriented policy and regulation. The content is situated within an understanding of technological innovation, market convergence and competition, and a digital ecosystem approach.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected,

you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
