

Registration information

Cyber threat intelligence

Training details

Modality: Online instructor led

Dates: 25 Jun 2024 - 28 Jun 2024

Training fees: \$0.00

Language: English

Application deadline: 19 Jun 2024

Training code: 24OI100392MUL-E

Contact: mlobin@cert.govmu.org

Training description

Cyber threat intelligence is an area of cybersecurity that focuses on the collection and analysis of information about current and potential attacks that can threaten the safety of an organization or its assets. It aims to give organisations an in-depth understanding of the threats that pose the greatest risk to their infrastructure and devise a plan to protect their business. This course is designed to introduce the in-depth concept of cyber threat intelligence to participants and provide them with the practical experience to gain cyber threat intelligence skills that are required to make security teams better, threat hunting more accurate, incident response more effective, and organizations more aware of the evolving cyber threat landscape.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
