Contact: fns@itu.int

Training description

The course on the Orbit-Spectrum International Regulatory Framework, with a specific focus on ITU's regulatory procedures, is designed to provide an introduction to the key principles of the regulations governing satellite projects. Participants will learn about the international legal and regulatory framework that governs the use and management of radio frequency spectrum and associated orbits. The course will also delve into ITU's specific regulatory processes, clarifying when and how to engage with this entity for requesting or registering radio frequencies for satellite projects. This knowledge is essential for anyone involved in satellite projects, ensuring compliance with global and ITU-specific regulations. Practical scenarios and case studies will be utilized to illustrate the application of these regulations in real-world situations.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account here
2. Register for the course here

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
