Description

The course aim is to: - Clarify organizations responsible to set the standards and mechanisms established by national authorities to enforce mandatory standards. - Help self-monitoring of players in order to conform to set standards and those of the regulator. - Analyze the available penalties for contravening the set standards. - Ensure the participants differentiate the different roles undertaken by various players in the field. - Assess cases for licensing based on pre-established set of standards. The course will cover specifically ICT standards and interoperability within ICT systems.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals,

irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
