Training fees: $0.00
Language: English

Application deadline: 07 Jul 2024
Training code: 24WS100412MUL-E
Contact: ghazi.mabrouk@itu.int

Training description

This training aims to develop a critical understanding of the challenges and critical success factors that need to be considered in considering the investment to spearhead the development of digital government. At a high level, the programme comprises three main areas of knowledge sharing and skills development organised into three major themes. Theme one establishes the contours of digital transformation by navigating and dissecting the social and economic value induced by the adoption and proliferation of digital technologies. The second theme is focused on mastering governance in the digital era by examining how government is impacted by digital technologies from administrative, sectoral and public service digitalisation perspectives. The third theme focused on a critical assessment of digital government strategies and the development of digital government capabilities. With generous support from the Global Gateway of the European Union, participation in this training programme is free of charge for selected applicants. This includes accommodation, meals, and other planned learning activities during the training. Participants or their organizations are responsible for covering their travel expenses.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
