Description

This training aims to develop a critical understanding of the challenges and critical success factors that need to be considered in considering the investment to spearhead the development of digital government. At a high level, the programme comprises three main areas of knowledge sharing and skills development organised into three major themes. Theme one establishes the contours of digital transformation by navigating and dissecting the social and economic value induced by the adoption and proliferation of digital technologies. The second theme is focused on mastering governance in the digital era by examining how government is impacted by digital technologies from administrative, sectoral and public service digitalisation perspectives. The third theme focused on a critical assessment of digital government strategies and the development of digital government capabilities. With generous support from the Global Gateway of the European Union, participation in this training programme is free of charge for selected applicants. This includes accommodation, meals, and other planned learning activities during the training. Participants or their organizations are responsible for covering their travel expenses.

Registration information

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
