**Training fees:** $0.00
**Language:** English
**Application deadline:** 06 Oct 2024
**Training code:** 24WS100417MUL-E
**Contact:** ituacademy@itu.int

## Training description

The course explains the foundational concepts and components for e-governance interaction in information society. It starts with an introduction to what information society is and how it has established the environment for e-governance development and digital transformation in the public sector. Then, the main building blocks of e-governance, their aims, initiatives, and enablers are

introduced, and how they are related to external subjects and domains. As the nature of the course is interdisciplinary, it entails an intersection of multiple domains by explaining the political, legal, social, economic, and IT variables impacting e-governance implementation. With the generous support of Global Gateway of the European Union, participation is provided free of charge for selected applicants, including accommodation, meals, and other organized activities for a comfortable and immersive learning experience. Participants or their organizations will be responsible for covering their travel expenses to and within Estonia.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

## How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
