Zero trust: a progressive and comprehensive approach to CII protection

Organized by:

Training details

Modality: Online instructor led

Dates: 14 Oct 2024 - 24 Oct 2024

Training fees: \$0.00

Language: English, English

Application deadline: 06 Oct 2024

Contact: ituacademy@itu.int

Training description

The Zero Trust Architecture (ZTA) approach is rapidly emerging as a pivotal trend in cybersecurity, particularly for the protection of Critical Information Infrastructure (CII). Unlike traditional security models relying on perimeter defense, ZTA operates on the principle of "never trust, always verify," ensuring that every access request is continuously authenticated and authorized.

This training course will cover the principles and benefits of ZTA through a series of instructor-led sessions. Examples of controls to implement, monitor and improve cybersecurity based on ZT principles will also be analyzed.

By understanding the principles of ZT, policymakers and CII regulators can proactively contribute to robust national cybersecurity by developing comprehensive control measures for all components of CII IT infrastructure, considering the latest cybersecurity achievements at the national level.

With the generous support of the Global Gateway Initiative of the European Union, this course is offered for free for selected participants.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
