Description

This course explains the linkages of ICT with the development of the Digital Economy and the need for appropriate policy and regulatory framework for developing the ICT Sector in any country.

The impact of broadband & digitization on a country's economy will also be explained. Issues and challenges associated with ICT policymaking will also be discussed. The participants will get deeper insights regarding the technology trends in ICT and their implication on various aspects of the economy and smart society through case studies of successful implementation of technology stacks leading to digital transformation in different countries.   Special emphasis on issues like data privacy, security and digital sovereignty in the context of international best practices. The participants will also be given a small project of developing an ICT Policy for a hypothetical country.

With the generous support of the Global Gateway Initiative of the European Union, participation is provided free of charge for selected applicants, including accommodation, meals, transportation from and to Indira Gandhi International Airport and other organized activities for a comfortable and immersive learning experience. Participants or their organizations will be responsible for covering their travel expenses to and from India.

Registration information

[Document on registration information (English)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
