## **Description**

This training will focus on LTE-Advanced and Beyond Networks. Among other issues related to LTE Networks, the following items will be covered:

Understand what LTE is, why it's used, how it works and what its future directions are.

LTE Evolution and How LTE is being enhanced by LTE-Advanced, and main expected changes and evolution toward 5G.

Identify limitations of LTE and areas of improvement, and how specific concepts and features in LTE-

---

Advanced address these issues.

Understand LTE Network and LTE system and service architectures.

Get a big perspective on how LTE and LTE-Advanced work, and how many of the latest communications and networking technologies are implemented in these systems.

## Registration and payment information

[Document on registration and payment information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
