Training fees: $0.00
Language: English
Application deadline: 25 Oct 2024

Training code: 24WS500155MUL-E-D
Contact: mahdi_zain_sha_aril_zain@imda.gov.sg

Training description

Delivered from the perspective of a small state and targeted at Director-level and above candidates from Forum of Small States (FOSS) countries involved in digital policymaking, this training course will share policy, regulatory and economic development approaches to digital transformation for a digital ready future. Referencing relevant examples from Singapore as well as other small states, it will focus on how small states can maximise opportunities in the digital economy (such as in the areas of data, digital public goods, and emerging technologies) while mitigating the accompanying risks. The training course will also explore how governments can work together with the private and people sectors.

With the support of the government of Singapore, participation is provided free of charge for selected applicants, including flights, accommodation, meals, and other organized activities for a comfortable and immersive learning experience.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
