Registration information

Improving Cyber Threat Intelligence (CTI) analysis skills using MISP for least developed countries (LDCs)

Organized by:

NRD Cyber Security

Training details

Modality: Online instructor led
Dates: *27 Nov 2024 - 28 Nov 2024*
Training fees: $0.00
Language: English
Application deadline: 21 Nov 2024
Training code: 24OI500173MUL-E-D
Contact: rj@nrdcs.lt

Training description

This hands-on training program is designed to equip attendees from Least Developed Countries (LDCs) with practical analysis skills using MISP, one of the most widely adopted Threat Intelligence Platforms (TIP) in the field. MISP is a robust, open-source platform that organizations can use to store, share, and receive information about malware, threats, and vulnerabilities in a structured manner. Training will be delivered under the Cyber for Good project.

Participants will engage in discussions about the reasoning behind various CTI analysis tasks and explore real-world scenarios to understand how responder teams effectively leverage CTI through MISP. With a focus on intelligence sharing, including contributions to TIP, students will acquire critical knowledge about what information can be shared, the appropriate methods for sharing, and the right recipients, all tailored to specific objectives.

They will also learn how to extract valuable insights from intelligence feeds, develop strategic questions, create effective queries, and share intelligence to maximize organizational benefits.

Access to the MISP platform will be provided, allowing participants to practice and complete homework assignments designed to reinforce their learning.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
