Description

National cyber crisis management course is the introductory two-day, scenario-based, purpose-built training designed to take attendees to the intermediate level.

The course will include both theoretical and practical components that cover a wide range of topics related to national cyber crisis management. Students will explore the main concepts of cyber crisis management, understand the key roles and responsibilities of key stakeholders involved in national cybersecurity crisis management, including the role CSIRTs.

In addition, the importance of effective crisis communication will be explained during the course. Lastly, the course will include a scenario-based discussion where participants will be able to test the knowledge acquired during the training course.

Registration information

Document on registration information (English)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals,

irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
