Practicing Cyber Threat Intelligence (CTI) analyst skills

Organized by:

Funded by

Global Gateway

Funded by the European Union

NRD Cyber Security

Training details

Modality: Online instructor led
Dates: *20 Jan 2025 - 10 Feb 2025*
Training fees: $0.00
Language: English
Application deadline: 06 Jan 2025
Training code: 25OI500181MUL-E-D

Contact: rj@nrdcs.lt

Training description

This course will equip attendees with practical analyst skills in Cyber Threat Intelligence (CTI) using MISP, one of the most widely used Threat Intelligence Platforms (TIP) in the industry. MISP is a powerful, open-source platform that organizations can use to store, share, and receive structured information about malware, threats, and vulnerabilities.

Participants will explore the rationale behind various analyst tasks and engage in real-world scenarios to see how responder teams effectively utilize CTI through MISP.

They will learn to extract valuable insights from intelligence feeds and master the formulation of strategic questions to maximize organizational benefits. The program will also emphasize the importance of contributing to the TIP, teaching participants how to create queries and share intelligence effectively.

With a strong focus on intelligence sharing, participants will gain essential insights into what information can be shared, how to share it, and with whom, for different operational needs. Access to the MISP platform will be provided, enabling participants to practice and complete assignments that reinforce their learning.

With the generous support of the Global Gateway initiative of the European Union, this course is offered for free for selected participants.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
